

Ranges of necessary wind power generation by 2050 in 95% decarbonization scenarios for Germany in TWh

Figure 4

Note: Figures are rounded; Acatech et al. models a 90% GHG emission reduction by 2050

Acatech et al. (2017), Agora Energiewende (2020), BDI (2018), BMU (2015), MWV (2018)
