

Recommended dynamic threshold for the GHG intensity of hydrogen

→ Fig. 9

[kgCO₂eq/kgH₂]

Agora Energiewende and Agora Industry (2024). Notes: The system boundaries and implementation details of these standards and requirements differ (see figure 8). The numbers for 2030 and 2040 have been rounded in the text accompanying this figure. The exact numbers used in Deloitte's modeling are 2.90 (2030) and 1.95 (2040) kgCO₂eq/kgH₂.
