

The Big Picture of a Just and Clean European Energy Transition in 2030

Launch event – with live video stream

Thursday, 7 March 2019

14:00-17:30 (followed by drinks and snacks)

Representation of the State of North-Rhine Westphalia to the European Union
Rue Montoyer 47
1000 Brussels

On 7 March, Agora Energiewende – in close cooperation with Agora Verkehrswende – will launch a new flagship report: ***European Energy Transition in 2030: The Big Picture***.

The report summarises 14 months of research and discussion with a broad range of experts, stakeholders and senior decision-makers in Brussels and capitals throughout Europe on the core challenges of a just and clean European energy transition. It identifies 10 concrete political priorities that would decisively advance the just and clean European energy transition in the next years, laying the ground for delivering what is “on the books” today and enabling a further acceleration where possible.

Based on rigorous analysis of the best available data and key trends shaping energy systems, the report also assesses the state of the clean energy transition in power, buildings, transport and industry. It explains the costs and benefits of the clean energy transition, and builds a case for why the European Union can and should play an important role in advancing a political project that concerns us all.

The launch event in Brussels will present key findings from the publication and feature discussions with leading European energy transition decision-makers and experts. We are also going to live video stream the event in order to allow a majority of persons interested in the topic to participate.

AGENDA

Moderator: Patrick Graichen , Executive Director, Agora Energiewende	
13:30	Registration and welcome coffee
14:00	<p>Welcome and opening of the event</p> <p>Hans H. Stein, Head of the Representation of the State of North Rhine-Westphalia to the European Union</p> <p>Patrick Graichen, Executive Director, Agora Energiewende</p>
